EDUCATION

Tulane University of New Orleans – New Orleans, LA

May 2027

Bachelor of Science, Computer Science; School of Science and Engineering

GPA: 3.935

Bachelor of Arts, Homeland Security; School of Professional Advancement;

Relevant Coursework: Machine Learning, Data Science, Operating Systems, Algorithms, AI Engineering, Artificial Intelligence

EXPERIENCE

Software Engineer Intern

Waterboro, ME

Textron Systems – Howe and Howe Technologies

June 2026 – Current

- Developed a modular C++ component testing and flashing framework for robotic control devices, enabling early detection of faulty or misconfigured components through simulated and embedded test stations
- Designed and implemented portable testing workflows using CAN bus and ESP32/M5Stack hardware, establishing reusable diagnostic for engineers and technicians to streamline quality control and reduce integration delays
- Produced detailed project documentation, unit tests, and architecture notes, supporting ongoing development and facilitating future extension toward robot Power-On-Self-Test capabilities and lab-based inventory validation

IT Business Partner Intern

Wilmington, MA

Textron Systems – Weapon Systems

June 2025 – August 2025

- Transition a legacy desktop application to a full-stack web application to manage queues for cut jobs on laser cutters and water jets. Utilize Python, Flask, JavaScript, HTML, and CSS to create a cohesive and efficient system, enhancing user experience and enabling additional features like data analytics and administrative controls.
- Integrate Microsoft SQL databases with the web application to ensure seamless data storage and retrieval, optimize performance while maintaining data integrity across all components.
- Coordinate with Engineering and IT teams to gather requirements and ensure the web application meets business needs, while thoroughly documenting the new system for future maintenance.
- Utilize Flask to create a robust backend, handling server-side logic and integrating with the front-end and databases to provide a cohesive and effective queue management solution.

Software Engineer Intern

Waterboro, ME

Textron Systems – Howe and Howe Technologies

June 2024 – August 2024

- Engineered an app that ensured simple and precise configuration of cameras on the Thermite unmanned ground vehicle. Mitigated user errors by making a simple interface and improving hardware connections to the controller.
- Created an application that tests direction of rotary encoders on different vehicles, cutting down former testing time significantly.
- Composed extensive software documentation on projects, including Class Diagram, High-Level Diagram, and Flow Diagram

Chapter Intern / Founder / President

New Orleans, LA

National Society of Leadership and Success

January 2025 - Present

- Founded a student expanding membership to over 460 members and led a 10-member executive board to coordinate 15+ events and member engagement throughout the year.
- Facilitate and organize chapter meetings and workshops, fostering leadership development and engagement among members.
- Collaborate with university administration and national leadership to plan and execute events, increasing chapter visibility and membership.

Research Assistant

New Orleans, LA

Tulane University – Emergency and Security Studies Department

January 2024 – Present

- Partner with government agencies to organize a federal career fair, attracting over 200 attendees and creating valuable internship and employment opportunities for students.
- Research and compile information on job opportunities and major-specific career paths for current and prospective students.
- Produce a podcast guiding students on specialized aspects of Homeland Security and the job field, attracting monthly listeners and subscribers.

LEADERSHIP AND MEMBERSHIP EXPERIENCE

American Sign Language, Introductory Business and Physics Tutor – Tulane Athletics Department

Approximately 10 – 15 students per week

Theta Tau Professional Engineering Fraternity – Nu Epsilon Chapter

Member

Alpha Alpha Alpha – Tri Alpha First Generation Honors Society

Member

Alpha Lambda Delta – Honors Society for students with a GPA > 3.5

Member

SKILLS

Programming Languages: Python, Java, HTML, CSS, JavaScript, SQL, C++, C#

Configuration Management and Communication: Git, GitHub, GitLab, Slack, Discord

Tools: Visual Studio Code, Flask, Tkinter, Pytest, Jira, Azure DevOps, Microsoft SQL Express, IIS Manager

Languages: American Sign Language (Intermediate)

Honors: Dean's List 6/6 Semesters, Merit Scholarship: \$20,000yr, Tulane Scholarship: \$60,60yr, Alumni Donors Award \$3,000yr
